

Helicopter Rescue Sling

P/N 16002-12

To conduct rescue operations, trained personnel employ specific naval, air or land vehicles aimed at safeguarding human life in particular dangerous situations and hostile environments in the mountains, land or sea, and also employs specific equipment.

Among the necessary equipment required by the search and rescue forces for the recovery of personnel in difficulty during military or non-military operations, we offer Rescue Slings for external loads for helicopters.

Avioconsulting offers maintenance and repair services – in addition to technical support for all products – available internally or on site.
