

Odeo Strobe

P/N SAF0615

The ODEO Strobe is designed for use in lifesaving situations as a collision warning signal, or to pinpoint your position in a distress situation. Approved to MED, SOLAS, MER and USCG requirements the ODEO Strobe is capable of a visible high intensity flash and includes an infrared signal. The ODEO Strobe has a maximum luminous intensity of 50cd visible or over 3 nautical miles. Lasting up to 2 days, the strobe light is also waterproof to 50m (IP68).
