

Inflatable Lifejacket

SOLAS 180n

P/N P200935

SOLAS lifejackets are designed for professional use: commercial ships, fishing vessels, windfarms and, oil-rigging platforms. They offer an optimal level of technicality to allow professionals to carry out their activity in complete safety.

Unique size: from 43 kg.

Waist size: 55-175 cm.

High performance

- 180 N actual buoyancy DAC 3010
- Dual chamber with 2 independents inflation systems. Manual and automatic firing
- Specifically tailored neck cushion and asymmetric air chamber, to provide the required free-board and quicker self-righting even in rough seas and wearing heavy professional gear

Premium materials and design

- HR durable and flexible fabric
- Outer shell with YKK QBZ® (Quickburst) zip closure: provides better protection of the air chamber and prevents outer shell untimely opening
- Zip with two quick burst points for a quicker deployment

Fully equipped lifejacket

- Integrated harness (depending on model)
- Double crutch strap (depending on model)
- Solas flashlight installed
- Pocket with safety line
- Straps for beacon and accessories
- Adjustable waist belt with quick-release

Specific top feature:

All SOLAS certified lifejackets feature a twin bladder air chamber to deliver the highest safety level required in professional extremely demanding conditions of use.

- 2 UML 5 auto inflation mechanism
 - 2 overpressure valves
 - 2 oral inflation tubes
- Inflation systems including a
Cylinder Safe Retainer (since 2020).

Servicing: 2 re-arming kits are necessary by lifejacket.
