

Saviour Technical Rescue Stretcher

P/N PMED0330

The very latest offering to the rescue sector, the Saviour Technical Stretcher supports both vertical and horizontal lift functions. It is the ideal all-purpose stretcher for use in confined space/restricted access rescue and hazardous environments.

Features

- Improved carry handles, new wrist cuffs, triple-lock carabiners on lifting bridle and groin harness
- Versatile – the stretcher can be carried, dragged, vertically lifted, floats and supports horizontal lifting
- All weather/environment rescue – impervious to fluids and sand, with positive buoyancy
- Easy to maintain – can be cleaned, with removable straps
- Minimal training requirement – colour coded straps aid application
- Infection control compliant – washable skin and removable/replaceable straps
- Provides C-spine (integral headblock) and pelvic fracture management
- Safe and secure – CE/EEC class 1 rated, 200kg (31 stone) load rated, low friction co-efficient
- Quick and efficient – C-Ray translucent and CT friendly
- Unique serial code – ideal for asset management
- Supplied with a standard fixed length lifting harness and compact carry bag or rucksack
- Load rating: 200kg (stretcher and vertical/horizontal lifts)
- Fits inside generic basket stretchers
- CE & EEC Class 1 certified
- Supports 2 or 4 person lift/carry with six soft lined carry handles
